DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eric Maschoff on July 8, 2004.

The application has been amended as follows:

In claim 21 on line 2, insert --anode-- between "metallic" and "substrate".

Allowable Subject Matter

Claims 1-9, 13-14 and 21-30 are allowed over prior art.

The following is an examiner's statement of reasons for allowance:

None of the prior art teaches or suggests an x-ray tube having a vacuum enclosure with a window and a target cap having top and side walls that together define a cavity that at least partially receives a first end of an anode substrate and in a manner such that the side walls extend in a direction towards a second end of the anode substrate as claimed in independent claim 1.

Claims 2-7 and 28-30 are allowed by virtue of their dependency.

None of the prior art teaches or suggests a target cap configured for attachment to a stationary anode substrate, the target cap having a planar top wall defining a target surface and a continuous side wall, wherein the walls cooperate to define a cavity into

which a portion of the stationary anode substrate is received, and the side wall produces secondary x-rays when impinged by electrons and the secondary x-rays having wavelength that do not interfere with a primary x-rays which produced from top wall as claimed in independent claim 8.

Claims 9 and 13-14 are allowed by virtue of their dependency.

None of the prior art teaches or suggests a stationary anode having a substantially metallic anode substrate with first and second ends and a x-ray target cap with top and side walls that together define a cavity that at least partially receives the first end of the anode substrate and in a manner such the that side walls extend in a direction towards the second end of the anode substrate as claimed in independent claim 21.

Claims 22-27 are allowed by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoon Song whose telephone number is (571) 272-2494. The examiner can normally be reached on 8:30 AM - 5 PM, Monday - Friday.
